

Registration and Warranty of Units

Registration & Warranty

It's of great importance that you register your unit within 60 days of install to ensure that you're kept up to date on what's going on with your unit in the event parts and or equipment are ever recalled. You'll also want to reap the benefits of the Manufacturer's 10-year Warranty in the event a part on the unit goes defective.

Please remember that routine filter changes are important to keep up on and will restrict air flow throughout the unit if this is not taken care of. Please make sure that lint, debris, and other types of matter stay away from your unit as it can clog and restrict air flow as well.

Registration can be found by copying and pasting the link below.

Before you start the process please make sure to have the **UNIT SERIAL NUMBER**, **DATE OF INSTALL**, **INSTALL ADDRESS**, and **DEALER NAME** present. You can find this information and more regarding your install on the back of the unit's door, directly on the back of the unit itself or in a paper holder close to the unit. This is typically where our technicians leave all registration and installation instructions.

- INFORMATION YOU WILL NEED -
